

LINKAGE SUPPORT SYSTEM FOR A WORK VEHICLE

Abstract of the Disclosure

A linkage support system and method for mounting and supporting a linkage on a work vehicle. The linkage support system includes a load bearing support and a removable linkage pin support rigidly attached to the load bearing support. The work vehicle is, typically, an earthmoving vehicle which includes a frame, a work tool such as a bucket, and a linkage for manipulating the work tool. The load bearing support may be a portion of the frame of the vehicle.
